Fremont High School Poolhouse Construction Update

- PROJECT UPDATE:** The Fremont High School Poolhouse is entering its 10th week of construction. All interior sheetrock has been removed and the wall and floor plumbing have been replaced. In the coming week new flooring will be poured. Once Department of State Architect (DSA) approves the structural design, the remainder of the building work can progress. The overall project timeline was delayed due to a necessary redesign of the trench drain system and structural changes. The tentative completion date is November 1, 2014.
- PROJECT LEAD:** The Fremont Union High School District is the lead on this project with input from the City of Sunnyvale. Since the poolhouse is located on a school campus, the DSA has permitting, inspection and approval authority.
- PROJECT SCOPE:** The project scope includes new heating and ventilation units, a redesigned and new floor drain system, new fixtures including lockers, benches, shower heads, and shower controls, new water heater and temperature controls systems, installation of moisture resistant wall board, and floor treatment.
- PROJECT TIMELINE:** The project began June 9, 2014 and is projected for completion November 1, 2014.
- POOL ACCESS:** The temporary pool entry will be adjacent to the bleachers near the entry on the pool deck. The bike racks will remain available for patron use. See map for additional information.
- The California Sports Center (CSC) office will be located in the athletic field ticket booth. CSC will also have a check in station located at the pool entry gate.
- While school is out for the summer break, the boys and girls school locker rooms will be available for pool patron until August 17, 2014. Starting August 18, 2014 changing rooms will be located just off the entry way of the pool. Outdoor showers will be located on the pool deck for patron use to rinse off. The outdoor (deck) showers will not be heated.
- PARKING:** School resumes August 18, 2014. Parking will continue to be shared with a variety of campus activities including pool programs, teachers, construction parking and other events utilizing school facilities. In addition to the lot located on Saratoga-Sunnyvale Road, the student parking lot located off of Fremont Avenue is available for overflow parking after 5pm on school days.

Thank you for your patience during this construction project. Additional information will be posted as construction progresses.
